

CINEMA 4D ACADEMY PROGRAM

Terms & Conditions

Cinema 4D provides the easiest entry into the fascinating world of 3D. Students are able to quickly achieve amazing results, which is an advantage that numerous educational institutions worldwide value greatly.

Since budget considerations are a critical factor for many institutions, MAXON offers its own form of financial aid. Via the Cinema 4D Academy Program (CAP), educational institutions can apply for free Classroom licenses if they are in financial need for a period of one year. This term can be extended if their Cinema 4D courses continue to be successful.

Program Conditions:

- MAXON offers free classroom licenses of Cinema 4D Studio to schools, colleges or universities. The institution doesn't have to be public or state operated but the enrollment fees must not significantly exceed the local average cost at public educational institutions
- The educational institution has to teach a degree program that incorporates instruction of Cinema 4D in the standard curriculum or offer comparable Cinema 4D courses on a regular basis
- It is required that the institution develops Cinema 4D courses and actively promotes them to the students. They can either make use of the CAP curriculum MAXON provides to design the courses, or develop own course materials tailored to the specific needs of the faculty
- The curriculum or course outlines for Cinema 4D courses have to be reviewed by the mentoring MAXON partner. Changes and amendments have to be made upon request of the mentoring MAXON partner
- Students should be actively encouraged to improve their Cinema 4D skills. MAXON may sponsor commercial copies of Cinema 4D or other material on request to foster the participation of students in Cinema 4D-related contests, etc.
- The mentoring MAXON partner will offer an initial training to ensure that teachers are familiar with Cinema 4D, and to ensure that Cinema 4D courses are conducted at high standards. Update trainings are provided after a new release and teachers are advised to attend to familiarize themselves with new features and workflows
- An administrator/contact person must be appointed for all Cinema 4D-related affairs
- Classrooms must be equipped with workspaces that meet the system requirements of the latest Cinema 4D version
- The institution will receive a sufficient number of licenses to equip the labs but is obliged to conclude MSA (MAXON Service Agreement) contracts for all licenses in use after the first year. Otherwise the licenses will expire after 12 months and the CAP membership will be terminated for the institution. Special MSA contracts for educational institutions are available at a very reasonable price
- In case there are difficulties fitting MSAs into the budget the institution can apply for an extension of the free licenses or upgrades to new releases of Cinema 4D in following years. However, MAXON does not guarantee approval to every request. The decision will be made individually and is based on the success of the CAP program at the institution.

This information sheet briefly summarizes the terms of the CAP program. If you have additional questions, please contact your local [MAXON partner](#) or write to the [MAXON education team](#).
